

User Guide

Getting Started

Think-AI is an AI-powered next-generation social platform.

Use chat, voice, image generation, and SNS features all in one platform.

Quick Start

Using AI Assistant

Chat

1. Click the AI Assistant icon on screen
2. Type your question in the text box
3. Press Enter (streaming response)
4. Switch models as needed

Capabilities:

- General Q&A and consultation

- Article summarization and creation
- Translation (JA/EN/ZH)
- Site content search

Voice Chat

1. Click the voice icon in AI Assistant
2. Allow microphone access
3. Speak — AI responds with voice
4. Interruption supported (just speak)

Image Generation

1. Ask "create an image" to AI Assistant
2. Enter prompt (e.g., "sunset beach")
3. Review and download generated image

SNS Features

Groups

ACTION	METHOD
Create group	Groups page → "Create" button
Join group	Group page → "Join" button
Post in group	Group post form
Manage members	Group admin only

Comments

- Post via comment form below articles
- Like or reply to other users' comments

- Report inappropriate comments

Gallery

- Upload images to galleries
- Secure S3 presigned URL upload
- Album management per group

Page Builder

1. Select "Page Builder" from menu
2. Create new page
3. Drag & drop elements from component palette
4. Configure element properties
5. Bind dynamic content with data binding
6. Click publish

Setting Reminders

1. Tell AI Assistant: "Remind me about the meeting at 10am tomorrow"
2. Reminder is automatically set
3. Receive SMS or push notification
